cmux

Ghostty bindings and prefix keys. Prefix: `Ctrl-b`. `Ctrl-b Ctrl-b` sends a literal `Ctrl-b`.

GHOSTTY: TABS

`⌘1` … `⌘9` `⌘0`	Go to a tab (`⌘0` is tab 10)
`⌘T`	New Claude session
`⌘⇧O`	New session in another directory
`⌘P`	Resume or fork a past session
`⌘⇧T` / `⌘G`	New shell / lazygit
`⌘⇧[` / `⌘⇧]`	Previous / next tab
`⌘J` / `⌘⇧J`	Next / previous tab with an alert
`⌘⇧←` / `⌘⇧→`	Move the tab (server: narrow / widen the tree)
`⌘R`	Rename the tab
`⌘S`	List the open tabs
`⌘⇧C`	Scroll back through output
`⌘W` / `⌘⇧W`	Stop the pane's session / quit (detach)

GHOSTTY: PANES

`⌘D` / `⌘⇧D`	Split right / below
`⌘⌥H` `J` `K` `L`	Go to the pane left / down / up / right
`⌘^H` `J` `K` `L`	Resize the pane by 5 cells
`⌘⇧↩`	Zoom the pane
`⇧↩`	Newline in Claude

GHOSTTY: PLANS (SERVER)

`⌘B`	Focus the plan tree, or go back to the pane
`⌘⇧B`	Hide / show the plan tree

PREFIX: TABS

`c`	New Claude session here
`C`	New session in another directory
`t` / `g`	New shell / lazygit
`n` / `p`	Next / previous tab
`M-n` / `M-p`	Next / previous tab with an alert
`0` … `9`	Go to a tab
`'`	Go to a tab by typed index
`l`	Last used tab
`w` / `f`	List and filter the open tabs
`s` / `r`	Resume or fork a past session
`,`	Rename the tab
`<` / `>`	Move the tab (server: narrow / widen the tree)
`&`	Stop all sessions in the tab

PREFIX: PANES

`%` / `"`	New Claude pane right / below
`←` `→` `↑` `↓`	Go to the pane in that direction
`C-arrow` / `M-arrow`	Resize the pane by 1 / 5 cells
`o` / `;`	Next pane / last used pane
`z`	Zoom the pane (toggle)
`{` / `}`	Swap with the previous / next pane
`!`	Move the pane to a new tab
`Space`	Next preset layout
`M-1` … `M-5`	Select a preset layout
`x`	Stop the session in the pane

PREFIX: OTHER

`[` / `PgUp`	Scroll back through output
`:`	Command prompt (tmux commands)
`i`	Show pid and session id
`d`	Quit (server: detach, agents keep running)
`?`	Help

cmux plans

Server mode: a plan is a workspace, a task is a tab, a sub-agent is a pane.

PREFIX: SERVER

`Tab`	Focus the plan tree, or go back
`B`	Hide / show the plan tree
`<` / `>`	Narrow / widen the plan tree
`P`	Next plan
`e` / `u`	Go to the executor / up one level
`v`	Board view (cards by state)
`a`	Needs-you overlay
`M-a` / `M-A`	Next / previous item that needs you
`m`	Message the focused agent
`=`	Take the terminal size from another client
`d`	Detach

TREE (FOCUSED)

`j` `k` / `↓` `↑`	Move
`h` `l` / `←` `→`	Collapse / expand
`Home` / `End`	First / last row
`Enter`	Open and focus the pane
`Space`	Preview (keep the tree focus)
`/`	Filter
`<` / `>`	Narrow / widen the tree
`Esc`	Back to the pane

TREE: ACT ON THE SELECTION

`A`	Accept the plan (starts it), or a task
`S`	Pause / resume the plan
`s`	Message the agent
`x` / `R`	Stop / resume the agent
`c`	Cancel the task
`X`	Delete the plan
`e`	Go to the executor
`o`	Open the task's PR
`g` / `D`	lazygit / diff in the worktree
`v` / `i`	Board / needs-you overlay

On the board, the same keys act on the selected card.

NEEDS YOU

`y` / `Y`	Allow / allow always (`y` accepts a plan)
`n`	Deny, or send a plan back
`r`	Reply to a question
`d`	Dismiss
`Enter`	Jump to the agent
`j` `k`	Move
`Esc` / `q`	Close

MESSAGE FORM

`Enter`	Queue for the end of the turn
`Alt-Enter`	Steer now

SESSION PICKER

type	Filter
`Enter`	Resume the session
`Ctrl-f`	Fork the session
`Ctrl-o`	New session in that directory
`Tab`	All projects / current directory

● open in cmux · ◆ running in another terminal

MOUSE

Click a tab	Go to the tab (wheel cycles)
Click a pane	Focus the pane
Drag a divider	Resize the pane
Click the tree	Focus the tree; a row previews it
Double-click a row	Open it and focus the pane
Drag the tree border	Resize the tree
Wheel in the tree	Move the selection
